

Signs Sublime Concept Slide Guide

Version 3, listing up to slide 2000.

by Larry Gagner
larry@signssublime.com
<http://signssublime.com>

This index covers up to slide: **2000** Reconciliation.

Introduction:

Thank you for purchasing the "*2000 Concept Slide Library*", by Signs Sublime. In teaching the Word, our Concept Slides introduce and/or reinforce a good portion of scripture visually and simply, and the more times these latent images are viewed, the stronger the Christian recall becomes.

I've taken the liberty of incorporating football nomenclature, some altered old "Burma Shave" signs, and more than a few ideas of my own and others. The impetus for Signs Sublime occurred unexpectedly while returning from an automobile driver training session. This time, when I saw The "DO NOT ENTER" sign, my mind, for reasons unknown, automatically added "INTO TEMPTATION" to it! Then, over the course of the next four years, I developed the road sign Christian equivalents found in this Concept Slide Library. I create new slides as I am inspired by the events in my life, so over time, additional slides become available for purchase.

We also have a Christian outdoor event, hosted by myself, called the "The Righteous Relays", that can be presented with or without Signs Sublime's Concept Slides. This field event uses my whimsically constructed props (worded cones, footballs, life saving buoys and buckets, plus minnow

nets) to teach Christian FUNdamentals. The "no body contact" allows every-body to participate! Experience has shown that everyone involved has a blast, including spectators and parents alike. I provide the directions with a "running" Christian commentary. We recommend cameras and cell phones for lasting memories and church related photos. At the conclusion of the event, we form a closing "huddle" around a table where I usually sign autographs and participants and spectators are welcome to pursue my high school., college, and professional scrapbooks. **You'll find "The Righteous Relays" at: <http://righteousrelays.com> .**

With use, Signs Sublime's Concept Slides remind and renew your Christian focus, so you're much more able to hold fast to the faith that was once delivered to us.

Sincerely in Christ JesUs,

Larry Gagner

Founder of Signs Sublime

Technical Guide:

The slide files are HD sized (typically 1482 x 1080), and stored in png format (a few are inadvertently jpg, none the worse...). "Portable Network Graphic" (png) files are widely used and supported, by nearly all presentation applications. From photo galleries to presentation applications, png files are very very common.

Add these files to your presentation, in the usual way, and you're set. To avoid potential problems, we have kept the file names free and clear of troublesome characters and naming practices that do cause trouble with some applications. The slide file names are free of spaces, and control and non-printing characters.

This guide lists the Concept Slides by number and title, and both or either can be used to specify the slides. Slides are stored according to their number, in directories of a hundred slides each, as explained below.

While we do not (cannot) support outside applications, so long as your presentation software supports png files, which it almost certainly does, then these files will be trouble free to use.

To search the Concept Slide Library, by title, just use the find function in this reader. (Ctrl-f, or Command-F — for Macs) Because the slides are indexed (up to 1919) in this document, the Find Function allows you to search by word(s) and/or number(s). When you find a slide to include in your presentation, note its number, and you'll find it in its corresponding directory. We've placed the slides into smaller directories (one hundred slides per directory), based on the slide number, making it easier to find your file. A directory of nearly two thousand files can be difficult to work with, depending on your equipment and expertise. Directories of a hundred make it very easy to locate any file within the Slide Concept Library. Just match the beginning of the slide number with the corresponding directory entries.

For instance, slide 536 is found within the 500_to_599 directory. 1397 is in 1300_to_1399. 21 is in 0_to_99. And so forth.

Another way of searching the Concept Slide Library is to search the Signs Sublime website, at <http://signssublime.com/welcome/signssublime/>. There, on the right, you'll find a "Search" box. Just below the "Search" box you can also pick by categories.

You can search the comments too, when present, to see what others are saying about particular Concept Slides. Comments are a living collection of user/customer feedback that shares our collective experience of using the Concept Slides. As a registered customer of Signs Sublime, you'll have access to concept slide comments, and be able to share your own tips on the use of particular concept slides.

Finally, if you print this guide, you'll have a printed list of all these concept slides, and be able to mark your copy with notes, and highlight concept slide names

Feedback is very important to our on-going development as company, and your needs are our concern. Let us know where we can better serve your needs. We depend on the merits of our work to survive, and work to make the 1900 Plus Concept Slide Library a worthy addition to your ministerial tools. Let others know about us! Recommendations are a core part of our marketing.
